404: BEYOND THE LIMITS

10TH & 11TH
DECEMBER

INDEX

INTRODUCTION

The BSc IT and BVoc Software Development departments of Jai Hind College are dedicated to shaping young minds into future-ready computer professionals through a robust curriculum and dynamic co-curricular activities.

The DOT COM CLUB, the official club of the IT and BVoc SD departments, is a club by the students and for the students. A new student committee is elected each year, encouraging active participation and fostering leadership, creativity, and collaboration.

We organize orientations in fun and informative ways that encourage freshers and give them and their parents a clear understanding of department life. Our annual tech fest Cyberstrike has become a landmark event in the college calendar.

THEME

We've all encountered a "404 Error" online. It's not a stop sign; it's a signpost. It tells us that what we're looking for isn't in the expected place, pushing us to explore further, search differently, and discover something new.

This year, we're applying that same principle to everything we do. "404: Beyond The Limits" is built on a powerful and exciting idea: that the boundaries we accept in technology, creativity, and our own potential are not immovable walls. They are simply outdated code waiting to be rewritten. We believe that when you push past this wall, you'll discover something far more exciting: a message that reads "Limits Not Found."

This theme is a direct challenge- to ourselves and to everyone watching, to rethink what can be achieved. It's about creating a space where innovation is unleashed, where ideas aren't shut down with "we can't," but encouraged with "what if?"

In essence, "404: Beyond The Limits" is more than our theme, it's our mindset and our mission. It is a call to stop asking "Can we?" and to start saying"We will."
